Card Type:	Card Number:	Expiry Date:	Security number:	Signature:	
Visa or Mastercard				I've also read and understood the conditions below.	

General Conditions

1. The deposit is non-refundable and secures your booking/place in the workshop. If Geovital needs to cancel the workshop for those dates, the deposit is refunded.
2. Cancellation by the student must be received in writing at least 2 weeks prior to the starting date/time of the workshop. After that the remaining course fee remains payable.
3. During the workshop, training shall be provided about the different areas of assessment used in a 'Geovital Academy' home assessment. Most of this is considered easy to remember but does require practice to improve ones skills. Our aim will be to make you as comfortable as possible doing an assessment and have the basics skills in order to fine tune your abilities on your own. Especially the detection of Geopathic Stress often requires additional practice. You will understand the workings, you will practice with us, but we can not guarantee you will master this skill by the time you finish the workshop. Most people do, or do shortly after.
4. The workshop involves theoretical components but also a large 'in-the-field' component. This could be in grass, maybe wet/cold/hot/sunny, maybe in rain, so please bring appropriate clothing, sunscreen and shoes. We can not be held responsible for damage to yourself or property. If you feel uncomfortable or concerned please tell us and we will try to improve the situation for you.
5. Transport is provided in a vehicle licenced for 7 people including the driver (Chrysler Grand Voyager or similar). At full capacity (6 students), seating comfort may be reduced.
6. If you have known allergies or intolerances, please tell during registration for the workshop.
7. Neither Geovital Akademie Austria, Geovital Academy Australia (trading name of Blue Remora P/L) or its representatives are liable for any personal injury or damage or theft of your belongings. Care is taken to provide a safe training environment. Please bring/wear suitable clothing, head- and foot wear.
8. There is no prerequisite for doing this workshop. Prior health care knowledge helps to relate to patients, but is not needed. The aim of assessments is to discover excessive radiation and make shielding suitable solutions available where needed. Shielding has shown to improve the quality of life for many people but may not result in the health improvements people are hoping for in all cases. Geovital assessors can and should not make any promises or claims about what shielding will do for the health issues of individuals. For this reason, there is no need for prior knowledge in a medical or therapeutic field.
9. Even though the range of illnesses that people have recovered from by being in an environment shielded by our products, neither Geovital Akademie Austria, Geovital Academy Australia (trading name of Blue Remora P/L) or any Geovital Academy Members are making claims that these products will heal any illnesses. These are shielding products, not medical devices, medicine or a treatment. During the workshop products will be available for purchase.

Changes of Conditions are possible. E&OE (December 2013)
